College of Computer and Information Sciences
Department of Computer Science
CSC113 – Computer Programming II – Midterm 1 Exam – Spring 2014

Exercise1:

Award class:

- Attributes:
 - **name**: the name of the award.
 - **awardYear**: the year of the award.
 - **cash**: the amount of money obtained if the award is won.
- Methods:
 - **Award (name: String, year: int, cash: double)**: constructor
 - **getYear()**: this method returns the year of the award.
 - **getCash()**: this method returns the cash of the award.

Movie class

- Attributes:
 - **name**: the name of the movie.
 - **year**: the year of the movie.
- Methods:
 - **Movie (name: String, year: int, size: int)**: constructor.
 - **addAward(a: award)**: this method adds the Award *a* to the Movie. It returns *true* if the Award *a* is successfully added. Otherwise, it returns *false*.
 - **computeTotalCash(y: int)**: this method returns the total cash of the Awards won by the movie in the year *y*.
 - **getHighestAward()**: this method returns the Award, won by the movie, having the highest cash.
 - **getYear()**: this method returns the year of the movie.

Action class:

- Attributes:
 - **minAge**: the minimum age that a spectator should have to be allowed to watch the Action movie.
- Methods:
 - **Action (name: String, year: int, minAge: int)**: constructor.

Comedy class:

- Methods:

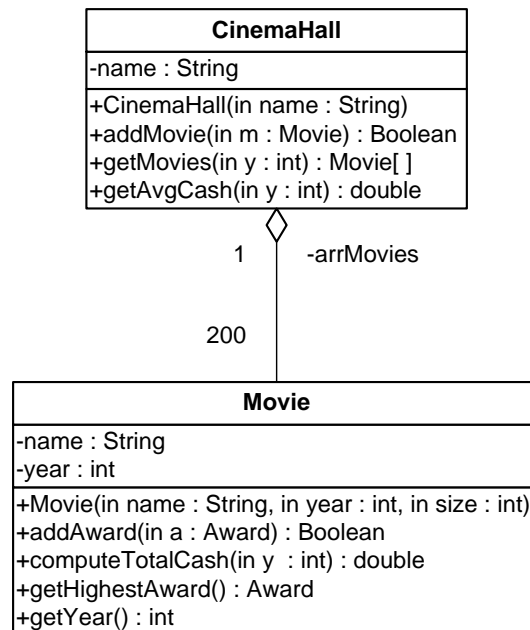

- **Comedy** (*name: String, year: int, duration: double*): constructor.

QUESTION: Translate into Java code the following classes:

- **Award** (do not implement the **getters**).
- **Movie** (do not implement the **getYear** method),
- **Comedy**.

Exercise 2:

Let's consider the same **Movie** class described in exercise 1.

CinemaHall class:

- Attributes:

- **name**: the name of the cinema hall.

- Methods:

- **CinemaHall**(*name: String*): constructor
- **addMovie** (*m: Movie*):this method adds the movie *m* to the cinema hall. . It returns *true* if the *Movie m* is successfully added. Otherwise, it returns *false*.
- **getMovies**(*y: int*):this method returns an array containing all the movies, of the cinema hall, released in the year *y*.
- **getAvgCash** (*y:int*):this method returns the average cash of the *Awards* won by the movie in the year *y*.

QUESTION: Translate into Java code the class **CinemaHall**.
